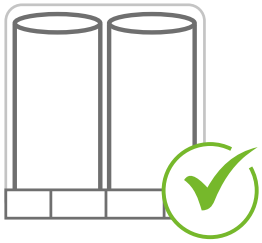
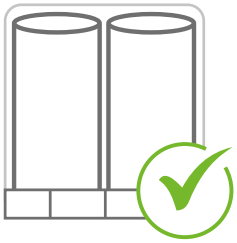
Storage & care of Superglass products.

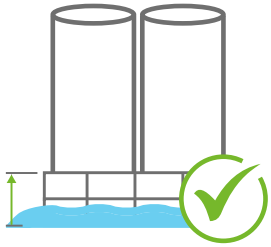
How to store Superglass insulation



Keep the product covered and in its original packaging until required.

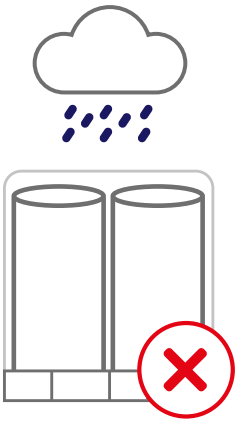


Wrapped pallets with an undamaged hood may be stored outdoors temporarily, provided they are kept off the ground and protected from the weather. Outdoor storage should be minimised wherever possible.

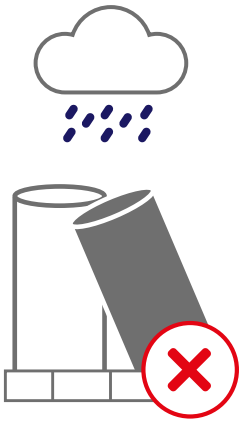


Keep products elevated on a pallet at all times to protect them from standing water and ground moisture.

Once the pallet hood has been removed, store products indoors, off the ground and protected from the weather.



Store products in a dry, well-ventilated area whenever possible.



Loose product exposed to rain or excessive moisture may become unfit for sale.

Please note: This guide is suitable for all Superglass roll, slab and batt products. Superglass pallets should not be double stacked.
