Our path to sustainability

In urban spaces and wild places, we are rethinking how the world is built. Each day, we focus our business towards building a more sustainable world for those around us. This is how we sustain and protect our customers, people, and planet. Today and tomorrow.

CEMENT

SAND

WATER

FIBRE

THE DNA OF CEDRAL

The ideal low maintenance, rot free alternative to traditional timber weatherboard.

Fibre cement offers both contemporary and flexible design options, and is used by many architects and homeowners to create stunning facades. The simple combination of wood cellulose, sand, synthetic fibres, water and cement make fibre cement one of the most environmentally friendly and comprehensive building products available.

Hard as stone, easy as wood.

The material's multi-layered fibre structure supports the cement and other elements, which gives it impressive strength, and means that it can be far thinner than concrete.

WHICH CEDRAL STYLE SUITS YOU?

CEDRAL LAP

Cedral Lap is specially designed so the planks are overlapped when installed to create a traditional clapboard aesthetic on your facade.

Length	3600 mm
Width	190 mm

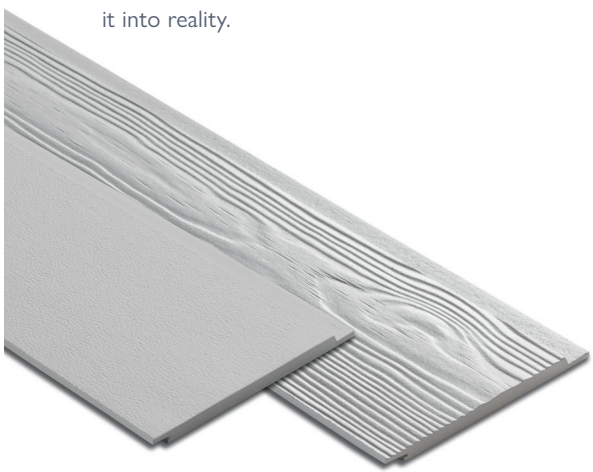
FINDING THE PERFECT COLOUR FOR YOUR FACADE

Your home's facade reflects your unique style and personality. Choosing the right colour can enhance its charm and make a lasting impression.

With Cedral's expertise and support, you can confidently select the perfect colours that will enhance the beauty and charm of your home. Whether you opt for dark or light, cool or warm, neutral, or vibrant shades, Cedral's commitment is to ensure that your home's facade becomes a captivating visual statement that you can take pride in. Trust in our guidance and let us assist you in creating a remarkable transformation that will leave a lasting impression on all who behold it. Your dream home exterior awaits, and Cedral is here to turn it into reality.



REFLECT YOUR PERSONALITY:

Your home should be an extension of your individuality. Consider the following questions to understand your personality and find a colour that resonates with you:

Are you outgoing and energetic? Bold and vibrant colours like in the **Expressive Collection** will suit you perfectly.

Do you prefer calmness, elegance, and tranquility? Consider the light and soft tones of the **Classic Collection**.

Do you want to highlight the lines and modernity of your home? You should find the perfect colour in the **Design Collection**.

Do you want to integrate your home within its natural surroundings? You'll find your perfect match in the **Natural Collection**.

CONSIDER YOUR SURROUNDINGS:

The environment in which your home is situated plays a crucial role in colour selection. Take these factors into account:

If you live in a lush, green environment, earthy tones like Clay Brown or Walnut Brown can harmonize with nature. For a coastal location, shades of blue such as Ocean Blue can evoke a seaside feel.

The architectural style of your home can influence colour choices. Traditional homes may look elegant with neutral shades, while modern designs can handle bolder, contrasting colours.

TEST AND VISUALISE:

Before committing to a colour, it's essential to see how it looks in different lighting conditions. Consider these steps:

- Request small samples to see how they appear against your home's exterior.
- Visualise Cedral on your home using our augmented reality app! Combining the latest AR technology and Cedral's full facade range, our app allows you to virtually try different Cedral materials and colours on your home so you can visualise your new facade in just a few clicks!

Choosing the right colour for your home's facade is a personal and exciting journey. By considering your personality, surroundings, home features, neighbourhood , and visualising the options, you can confidently select a colour that reflects your style and creates a welcoming impression for years to come.

Remember, Cedral is here to guide you through this process, offering advice and assistance to help you make the best choice. Together, let's transform your home's facade into a stunning reflection of your personal style and preferences.

Design Collection

a modern statement

Embrace the power of simplicity

A monochromatic palette, curated to highlight the lines of your home and make bold design statements. Based on black and grey tones, the Design Collection creates a sense of timeless permanence where less is more.

Cedral Click Wood

Focused

The Design Collection empowers to create a focused, minimalist aesthetic that stands the test of time.

Slate Grey for a solid look. A refined colour with subtle blue undertones, inspired by slate material. Strong and steady, it exudes a sense of sophistication and maturity, giving homes a modern look while complementing different colours and textures. When combined with light tones, Slate Grey creates a striking visual contrast.

The impact of the Black and Silver Grey colour combination on our facade

Choosing the right colour combination for a building's exterior facade is a significant decision. It not only sets the tone and style of the building but also has the power to leave a lasting impression.

Black is a colour that exudes elegance, sophistication and timelessness. Its deep and powerful nature draws attention and adds a touch of drama and excitement to any structure. "When envisioning our building, we knew that incorporating black as a key element was essential. We were captivated by the versatility of black as it seamlessly blends into various architectural styles, from contemporary to traditional." The commanding presence of black creates a striking contrast with the surroundings. It forms a visually appealing focal point, accentuates the building, and leaves a lasting impression. The intense nature of black also emphasizes the architectural features and lines, giving the overall design depth and dimension.

On the other hand, Silver Grey complements black with its understated elegance and modern allure. It is a versatile colour that effortlessly integrates into different designs and adds a touch of sophistication and subtlety. Silver Grey brings a contemporary touch to the overall colour palette and enhances the visual appeal of the building.

It has the unique ability to reflect light and create a subtle shimmer that adds depth and texture to the facade design. This effect is particularly fascinating when sunlight interacts with the surfaces, creating a dynamic interplay of light and shadow. The soft and soothing nature of Silver Grey also creates an atmosphere of calmness and serenity within the building.

The Powerful Combination: When Black and Silver Grey are combined, a powerful and captivating visual effect is created. The contrast between the two colours is striking, with Black making a bold statement and Silver Grey offering refined balance. This combination infuses the facade with a sense of dynamism and tension that captivates the viewer's attention.

"We are thrilled with our decision to incorporate the Black and Silver Grey colour combination into the exterior facade of our building. It has elevated the overall design and turned it into a highlight in our surroundings. The versatility, timelessness, and ability to leave a lasting impression has exceeded our expectations, and we take pride in labeling our building as a true testament to the fascinating impact."

Expressive Collection

creating a characterful home

Rekindle the vibrancy and originality of a home

A rich palette designed to complement and contrast existing materials. Deeply saturated colours draw inspiration from brick, metals and corten steel and create a unique and eye-catching look.

Cedral Click Wood and Lap Wood
C75 **Metal Green**

Pewter Grey for a perfect background. The deep and muted colour refers to natural elements and creates a sense of stability, with a modern twist. Its brown and grey layers add a distinctive yet soothing touch to a home. Timeless and suitable for durable and practical facades.

Cedral Lap Wood
C74 **Basalt Grey**
Horizontal

The transformative effect of Basalt Grey in combination with brick and render

The choice of the right colour combination for a building's facade can play a significant role in creating an impressive and appealing appearance.

Contrast and Balance: The combination of Basalt Grey with red brick and white plaster creates a fascinating contrast and a balanced harmony. The red brick brings a warm and inviting atmosphere, while the white plaster adds a clean and bright aesthetic. Introducing Basalt Grey as a third colour gives the facade a modern and refined touch. The contrast between different colours and textures creates visual dynamics that draw attention and make the building stand out from its surroundings.

Timeless Elegance: Basalt Grey is a colour that exudes timeless elegance and sophistication. In combination with other materials, it gives the building a contemporary and appealing look. Basalt Grey acts as a neutral background that harmoniously complements the vibrant colours of the brick and the brightness of the render.

Emphasizing Architecture: The colour Basalt Grey plays an important role in emphasizing the architectural features of the building.

By using Basalt Grey in specific areas of the facade, these architectural details are highlighted and gain additional visual significance. Basalt Grey serves as a contouring element that accentuates the building's shapes and lines, giving it structure and depth.

Emotional Impact: Colours have a strong emotional impact on people and can influence mood and perception. The combination of Basalt Grey with other materials creates a specific atmosphere and emotional resonance.

Long-term Value Appreciation: A building with an attractive facade generally has a higher market value and better rentability. The combination of these colours creates a timeless and appealing aesthetic that remains current over the years and leaves a positive impression on potential buyers or tenants. Additionally, the energetic refurbishment of the ventilated facade has led to a significant increase in the building's value.

The decision to choose this colour combination will undoubtedly contribute to making the building impressive, contemporary, and appealing to both owners and viewers.

Natural Collection

making nature part of the home

Embrace holistic and conscious living

A colour palette guided by nature to build homes in harmony with their surroundings. Inspired by the scents, sounds, and textures found in nature, the colours awaken multiple senses.

Cedral Click Wood
C21 **Walnut Brown**

Crafted

The Natural Collection refers to richly textured organic materials and brings a lively, artisanal feel.

Cedral Lap Wood
C71 **Sand Yellow**
Horizontal

Sand Yellow for brightness. A bright, warm colour with a particularly uplifting effect. Even a small amount of sand yellow enlivens the exterior reflecting a natural living with a positive attitude.

Cedral Lap Wood
C73 **Ocean Blue**
Horizontal

The use of Ocean Blue in harmony with nature

The use of Ocean Blue from the Natural Collection on the facade of a building is a decision that holds both aesthetic and symbolic significance. This natural colour establishes a connection with nature and creates a harmonious and appealing visual effect.

Ocean Blue is a cool and calming colour that evokes the tones of the sea. It generates a sense of freshness and tranquility, conveying a natural atmosphere. This colour blends beautifully with various architectural styles and can convey a multitude of messages.

The use of Ocean Blue on the facade can establish a visual connection to water. It brings to mind the soothing sound of waves and the vastness of the ocean. This association can have a calming and relaxing effect, imparting a sense of freedom and harmony.

Furthermore, the use of Ocean Blue can convey an ecological message. The colour reminds us of the pure and clear water of the ocean, symbolizing the importance of water for life on Earth. It serves as a reminder of the need to protect and preserve our water resources.

Moreover, Ocean Blue possesses a timeless elegance that remains relevant in the future. Unlike trendy or seasonal colours, Ocean Blue maintains its relevance and aesthetics over the years. This longevity is particularly important when it comes to facade design, as it should remain attractive and enduring in the long run.

The use of Ocean Blue can also emphasize and highlight the architectural features of the building. This cool colour can accentuate the lines and forms of the structure, lending it visual depth. By incorporating Ocean Blue, architectural details can take centre stage and enrich the overall image of the building.

Ocean Blue can also create a strong contrast with the surrounding environment, making the building a focal point. This contrast can pique the interest of viewers and draw their attention to the structure. It can transform the building into a distinctive feature in the landscape.

Classic Collection

the epitome of elegance

Enhance your way of living

A harmonious colour palette selected to create a calming and inviting atmosphere. With a palette of light and soft tones, the collection imbues a home with an atmosphere of ease, beauty and timelessness.

Timeless

A family home graced with a timeless colour palette to be treasured for years to come.

Pebble Grey for a lavish setting. A warm classic colour that welcomes you home. It pairs particularly well with dark wood doors, window trims and balconies, creating a homey nest. Due to its practicality, surfaces are easy to maintain because the colour doesn't show dirt easily.
