

Promat

PROMAT Pipesel PPS Slab Penetration

Installation Instructions

The PipeSeal PPS Slab Penetration Collar is designed to be fixed to the form work prior to pouring concrete floor slabs to provide openings in floor slabs for non fire resistant plastic pipe penetrations. The collar is available in FIVE (5) sizes to accommodate pipes with an outside diameter (OD) of 43mm, 55mm, 69mm, 83mm or 110mm.

Installation Method

After the form work has been stripped, the piece of pipe may be removed from the PipeSeal® collar leaving an opening in the floor ready for the installation of the service.

Typical Specification

Where a non fire rated opening in a concrete slab is required to be formed, use Promat Pipesel PPS Slab Penetration

Dimensions Guide

Code no.	Pipe OD (mm)	Pipe nom. (mm)	Body (mm)			Flange (mm)
			H	D1	D2	D3
PPS 40	43	40	78	43	115	160
PPS 50	55	50	78	55	115	160
PPS 65	69	65	68	69	115	160
PPS 80	83	80	78	83	163	210
PPS 100	110	100	78	110	163	210

PipeSeal collars are designed to provide openings in cast slabs. This product will not provide a seal in the event of a fire and has no fire resistance classification.
